

ISM Advanced Eco Driving

What will I learn as an Advanced Driver?

- To control your vehicle with precision
- To drive with concentration and awareness
- To anticipate the actions and mistakes of others
- To understand modern vehicle dynamics
- To develop an 'environmentally friendly' driving style
- To act appropriately and always leave a comfortable safety margin
- To be able to deal affectively with all types of hazards

What does the course entail?

The 4 hour training session consists of:

- A copy of Roadcraft – the **standard text** for Advanced Driving
- Online Psychometric Test – to ascertain your **behaviour** on the road
- 1.5 hr in class presentation covering the risks each driver faces on the road everyday, as well as '**systematic vehicle control**', the standard method of advanced driving.
- 2.5 hr on road training and assessment

The presentation covers in theory what each driver will apply on road

Each trainee will receive a **certificate of attendance** and a comprehensive report on their driving with recommendations for further training where applicable

Benefits of Advanced Eco Driver Training:

- Savings on your annual petrol and car maintenance bills.
- Increased career opportunities.
- Increased safety for you and other road users.
- Increased enjoyment of driving that comes with added confidence and competence.
